

Present the result of calculation in an essay that answers the following questions:

- What aspect in your daily life increases your footprint the most?
- What will be your action to reduce it?
- Why is knowing your carbon footprint important?
- As a young Filipino citizen, what can you do to achieve the goals of environmental sustainability?

- The aspect that increases my digital footprint is food.
- I will eat less meat and grow vegetables in my yard to reduce the size of my carbon footprint.
- Knowing your carbon footprint is important because it helps you come up with a solution to change your ways to reduce your carbon footprint.
- As a young Filipino Citizen, what I can do is reduce the amount of my footprint, practice sustainability, and support renewable energy to reduce emissions
